

I BEG YOUR GARDEN!?

The Ag plot has had lots of busy bees so far this term. The Foundation - Year 6 students and the Year 8's and 9's have so far prepared the garden beds, sown the garden beds and the wicking beds, and transplanted the plants from the food ladder system into the wicking beds.

The 9 chickens that hatched last term were moved into the big chicken pen as they were all hens!!

The winter weeding was smashed out by the excellent work of the Year 8's and the Year 9's have finished building their calf enclosure for their arrival in August.

Lastly, the Primary's and Year 8's are patiently awaiting their mushrooms to grow in the dark.
